

Regenerative Agriculture?

A grass roots movement making 'nature conservation' obsolete

Jörgen Andersson

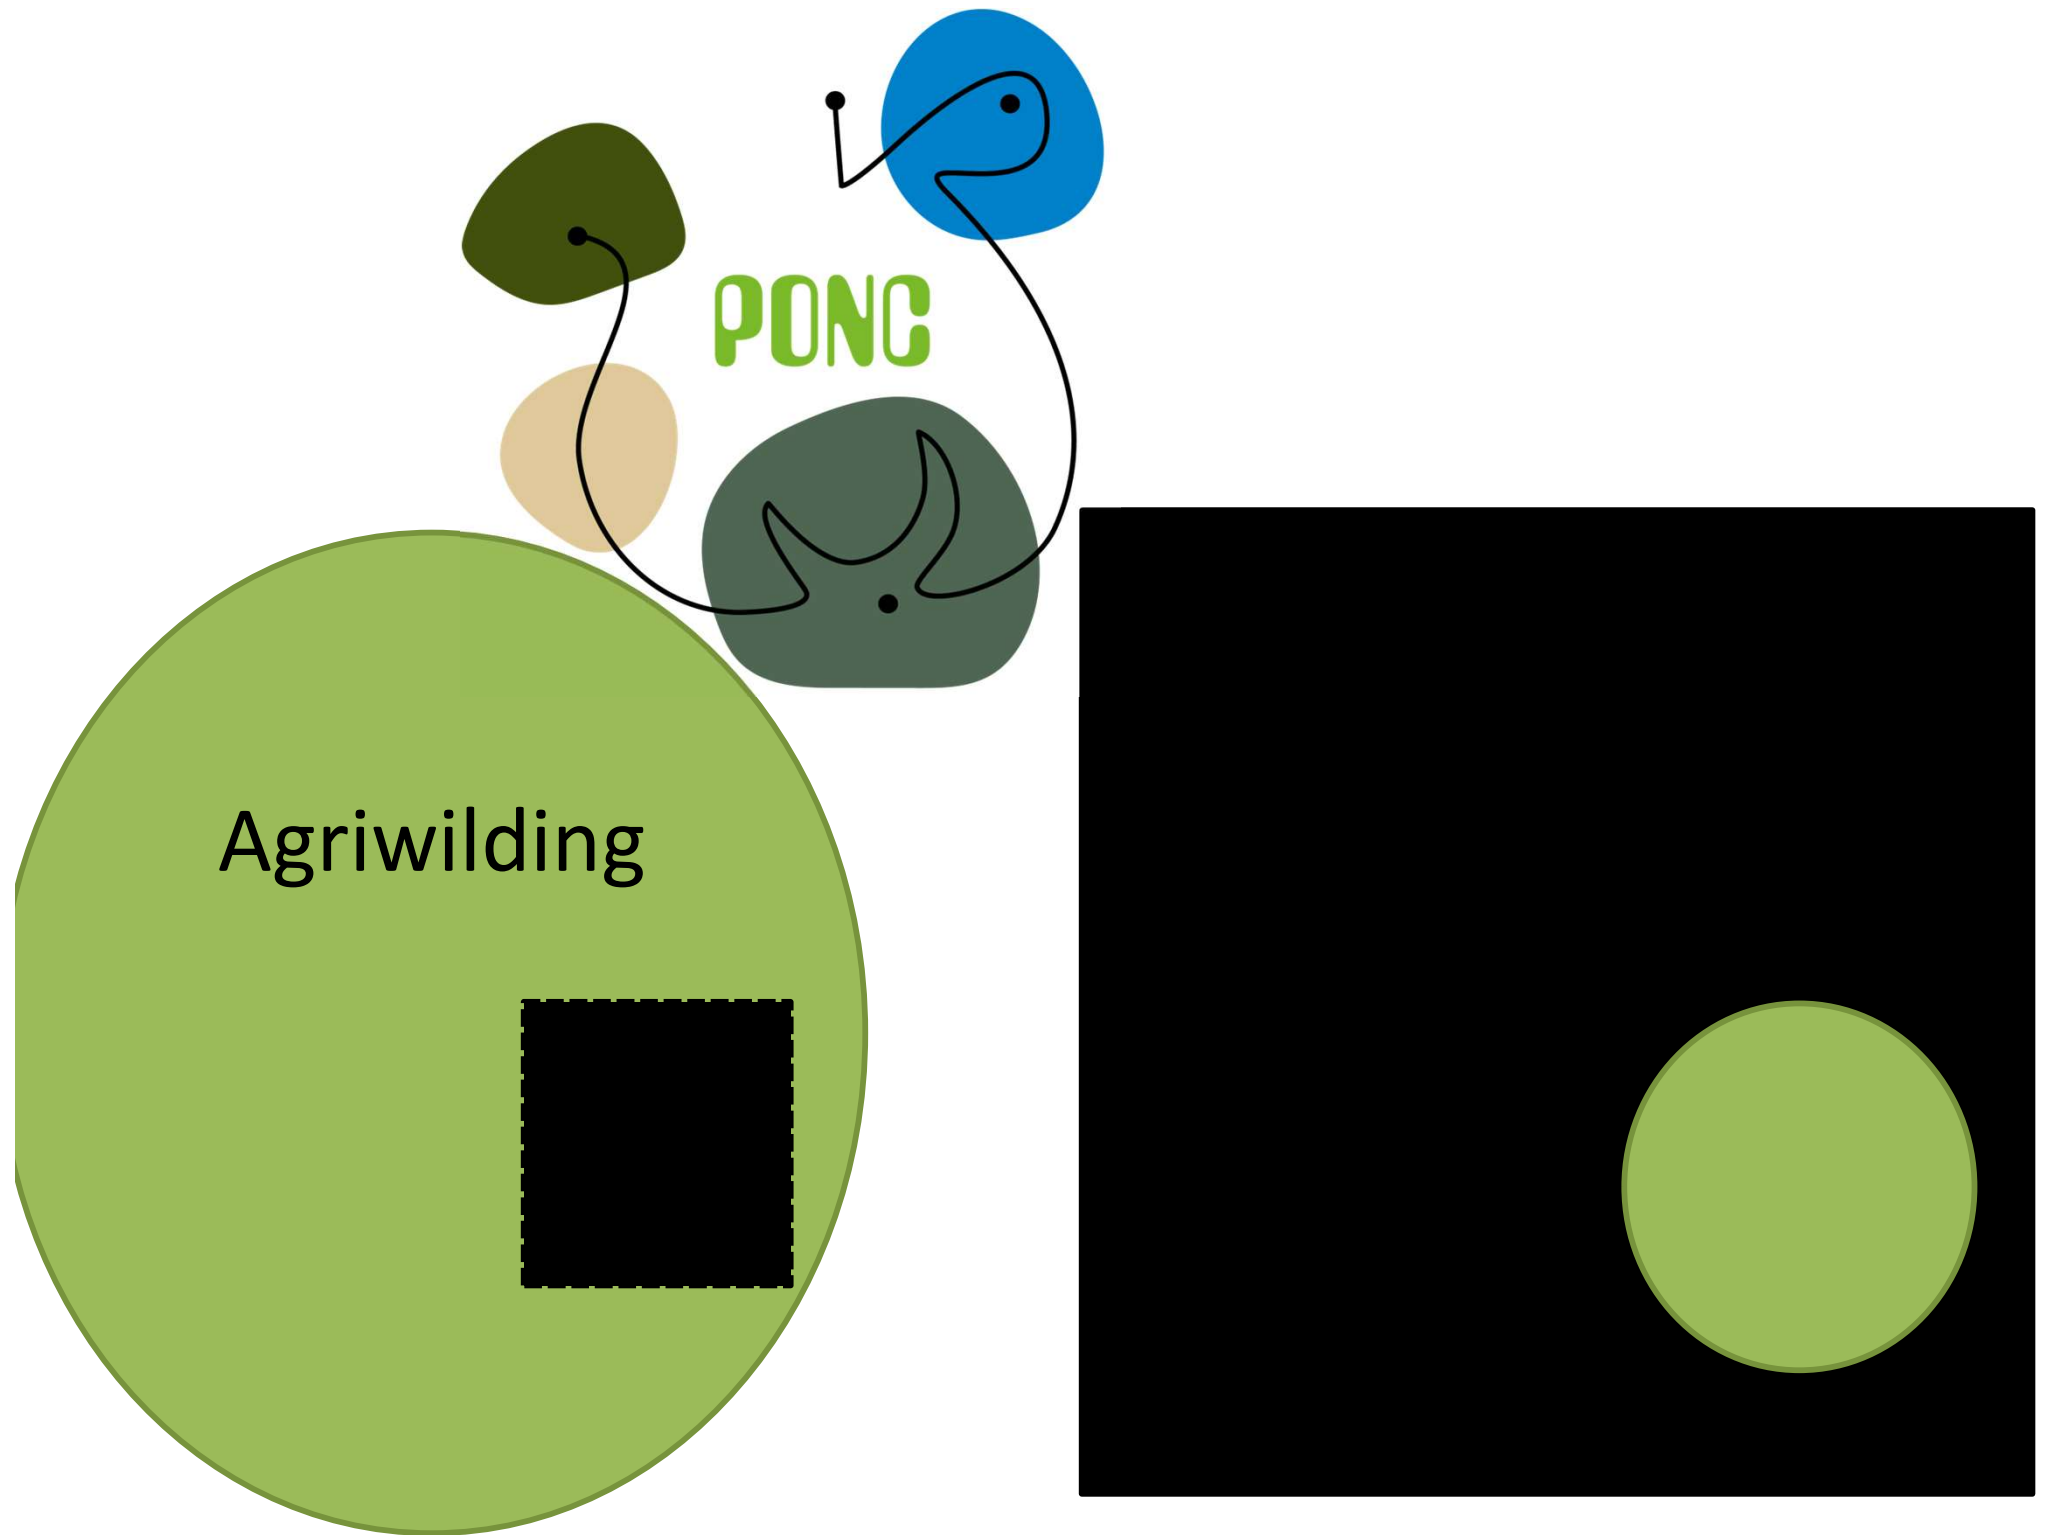

Savory Institute Nordic Hub, Sweden

Co-funded by the
Erasmus+ Programme
of the European Union

**The overall effect of my daily decisions

**The overall effect of my daily decisions
keeps people and nature apart**

There are no valid reasons
for monocultures to
dominate any landscape!

n for your map.

Low value monocultures on high value land

- Bad for our health, physical and mental
- Bad for animals, domestic and wild
- Bad for ecosystem vitality
- Bad for household economies
- Good for industry and tax revenue

Farmers / soldiers are responsible
for carrying out orders

Governments for giving them

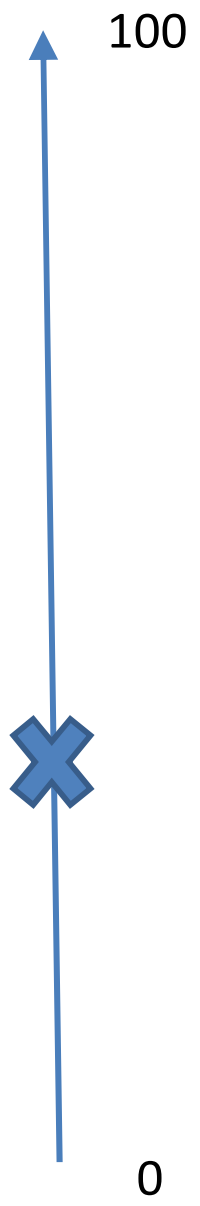

But “responsible”
means
“response-able”

“The great cause of inequality in the distribution of wealth is inequality in the ownership of land. The ownership of land is the great fundamental fact which ultimately determines the social, the political, and consequently the intellectual and moral condition of a people.”

Henry George

Progress and Poverty 1879
